Ali Mohammed Al-Bayati

Frontend Developer | Next.js | React | TypeScript

alialbayati468@gmail.com | +963 967 212 983 | Iraqi National | Based in Aleppo, Syria | github.com/Ali4681 | linkedin.com/in/ali-al-bayati-59b41b319

PROFESSIONAL SUMMARY

Frontend Developer with professional experience architecting high-performance, responsive web applications using Next.js, React, and TypeScript. Skilled in building reusable component libraries, integrating RESTful APIs, managing complex application state, and deploying production-grade applications via CI/CD pipelines. Experienced with multi-language RTL interfaces, Firebase integrations, and Agile development workflows.

PROFESSIONAL EXPERIENCE

Frontend Developer (Part-time) — RAIZER (Startup Funding Platform) Mar 2025 – May 2025 | Aleppo, Syria

- Led frontend development of a startup funding marketplace using Next.js, React, and TypeScript.
- Built real-time chat UI, expert profile verification, and offline-ready video playback.
- Optimised Lighthouse performance scores through code splitting, lazy loading, and image optimisation.
- Integrated FCM push notifications and role-based UI rendering for investors and founders.

Frontend Developer — RADAR Company Feb 2023 – Oct 2023 | Aleppo, Syria

- Built and maintained responsive web interfaces using Next.js, React, and TypeScript across multiple production products.
- Developed a reusable component library with ShadCN UI and Tailwind CSS, cutting UI development time by approximately 30 percent.
- Implemented Redux Toolkit and Zustand for scalable state management across complex multi-step user flows.
- Integrated RESTful APIs in close collaboration with backend engineers, optimising data fetching and page performance.
- Added full multi-language and RTL (Arabic/English) support via i18n, expanding accessibility across MENA markets.
- Integrated Google and Apple OAuth and Firebase Cloud Messaging (FCM) for secure authentication and push notifications.
- Deployed applications on Vercel and Contabo VPS with Nginx reverse proxy, PM2 process management, and CI/CD pipelines.

PROJECTS

University Timetable Generation System — Capstone

Next.js | *NestJS* | *MongoDB* | *Mongoose* | *CSP Algorithms*

- Full-stack scheduling system using Constraint Satisfaction Problem (CSP) algorithms to auto-generate conflict-free university timetables.
- Built a NestJS backend with MongoDB and Mongoose for flexible storage of scheduling constraints, rooms, courses, and generated timetable scenarios.
- Admin dashboard with real-time schedule review, scenario comparison, and instant conflict detection.

Raizer — Startup Funding Platform Frontend

Next.js | *React* | *TypeScript* | *ShadCN UI* | *Tailwind CSS* | *Firebase FCM*

- Modern startup showcase platform with real-time chat UI, expert profile verification, and offline-ready video playback.
- Optimised Lighthouse scores through code splitting, lazy loading, and image optimisation.

Islamic Inheritance Management System
Next.js | React Flow | TypeScript | Tailwind CSS | i18n RTL

- Built an interactive family tree UI using React Flow with dynamic node relationships and real-time inheritance share calculations.
- Developed a typed data layer with custom React hooks for consuming REST APIs, including optimistic updates and error boundary handling.
- Implemented full Arabic RTL interface with i18n support and accessible component design.
- Integrated Arabic PDF report generation trigger with preview rendering before download.

EDUCATION

B.Sc. in Information Technology and Communications Engineering — Ebla Private University
Sep 2019 – Jun 2025 | Aleppo, Syria

Coursework: Software Engineering, Computer Networks, Database Management, Web Technologies, Communication Systems. Capstone: University Timetable Generation System (Full-Stack, NestJS, MongoDB, CSP-based).

CERTIFICATIONS

Cybersecurity Training Program — Darrebni Company Sep 2024 – Jan 2025 | Remote

Covered network security, web application penetration testing, threat detection, incident response, and vulnerability management. Received official recommendation letter.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript ES6+, TypeScript, HTML5, CSS3, Tailwind CSS, ShadCN UI

State Management: Redux Toolkit, Zustand, Context API

APIs and Services: RESTful API Integration, Firebase Auth, Firebase FCM, Google OAuth, Apple OAuth, WebSockets

UI and UX: Responsive Design, RTL Support, Multi-language i18n, Accessibility, UI/UX Principles

Tools and DevOps: Git, GitHub, Docker, Vercel, Nginx, PM2, CI/CD Pipelines, VPS Contabo

LANGUAGES

Arabic: Native / Bilingual | English: B2 Upper Intermediate (Professional Working Proficiency)
