Ali Mohammed Al-Bayati

Mobile Developer | React Native | Expo | TypeScript

alialbayati468@gmail.com | +963 967 212 983 | Iraqi National | Based in Aleppo, Syria | github.com/Ali4681 | linkedin.com/in/ali-al-bayati-59b41b319

PROFESSIONAL SUMMARY

Mobile Developer with extensive development experience building high-performance, cross-platform applications using React Native and Expo for iOS and Android. Skilled in component-based UI architecture, state management with Redux Toolkit and Zustand, RESTful API integration, real-time WebSockets, offline-first design, Firebase Cloud Messaging, multi-language RTL support, and AI model integration.

PROFESSIONAL EXPERIENCE

Mobile Developer — RADAR Company July 2025 – Feb 2026 | Aleppo, Syria

- Developed and maintained cross-platform mobile applications using React Native and Expo, targeting both iOS and Android from a single codebase.
- Built a reusable mobile component library with consistent design tokens, reducing screen development time significantly across projects.
- Integrated RESTful APIs in close collaboration with backend teams, implementing efficient data fetching, caching, and error handling strategies.
- Implemented Redux Toolkit and Zustand for predictable, scalable state management across complex multi-screen user flows.
- Added full multi-language and RTL (Arabic/English) localisation using i18n, enabling seamless MENA market support on both platforms.
- Integrated Google and Apple OAuth for secure authentication and Firebase Cloud Messaging (FCM) for targeted push notifications.
- Optimised app performance through lazy loading, memoisation, FlatList virtualisation, and bundle size reduction techniques.

PROJECTS

Traffic Violations Management System — Mobile

React Native | *Expo* | *TypeScript* | *OTP via Telegram* | *GPS* | *Offline Sync*

- Built three distinct React Native apps (Citizen, Officer, Admin) from a unified TypeScript codebase, targeting iOS and Android.
- Citizen app: OTP-based registration and login via Telegram bot, vehicle management, violation history, electronic payment with receipt generation, and push notifications.
- Officer app: violation registration with license plate input, GPS location capture, and photo attachment; full offline mode with automatic background sync.
- Admin app: officer account review and approval dashboard, violation type management, analytics and statistics, user management, and audit log viewer.

Olive Leaf Disease Detection — AI Mobile Application

React Native | *Expo* | *Flask* | *Python* | *MobileNetV2* | *Transfer Learning* | *TensorFlow*

- Collected and labelled an olive leaf image dataset across 4 classes: healthy, acarus, peacock eye, and olive knot; applied augmentation and class-balancing techniques.
- Trained a MobileNetV2 model using Transfer Learning in two fine-tuning phases, achieving 98.10 percent validation accuracy on disease classification.
- Developed a Flask REST API to serve the model and built a React Native app allowing field users to capture or upload leaf photos and receive instant diagnosis.

Floppy Ball — Gyroscope and Voice Controlled Game

React Native | *Expo* | *Gyroscope Sensor* | *Voice Recognition* | *TypeScript*

- Developed a mobile game where the player controls a ball's height using device gyroscope tilt or real-time voice input, providing two distinct control modes.
- Integrated Expo sensor APIs for gyroscope data and voice amplitude detection to drive smooth, physics-based ball movement.

Vosk Offline Speech-to-Text Application

React Native | *Expo* | *Vosk Speech Recognition* | *TypeScript*

- Built a mobile application integrating the Vosk offline speech recognition model, converting spoken audio to text entirely on-device without internet connection.
- Implemented real-time transcription with support for continuous audio streaming and instant text output display.

LegalConnect — Legal Services Platform

React Native | *Expo* | *Firebase FCM* | *MongoDB API*

- Cross-platform mobile app enabling clients and lawyers to browse, submit, and track legal case workflows.
- Built real-time messaging UI, case status tracking, document upload flows, and role-aware UI rendering.

EDUCATION

B.Sc. in Information Technology and Communications Engineering — Ebla Private University

Sep 2019 – Jun 2025 | Aleppo, Syria

Coursework: Software Engineering, Computer Networks, Database Management, Web Technologies, Communication Systems. Capstone: University Timetable Generation System (Full-Stack, NestJS, MongoDB, CSP-based).

CERTIFICATIONS

Cybersecurity Training Program — Darrebni Company

Sep 2024 – Jan 2025 | Remote

Covered network security, web application penetration testing, threat detection, incident response, and vulnerability management. Received official recommendation letter.

TECHNICAL SKILLS

Mobile: React Native, Expo, JavaScript ES6+, TypeScript, iOS and Android Development

UI and Navigation: React Navigation, Mobile UI Components, Responsive Layouts, RTL Support, Multi-language i18n

AI and Device APIs: MobileNetV2, Transfer Learning, Vosk Speech Recognition, Gyroscope Sensor, On-device Inference

State Management: Redux Toolkit, Zustand, Context API

APIs and Services: RESTful API Integration, WebSockets, Firebase Auth, Firebase FCM, Offline Sync, Google Maps API

Auth: Google OAuth, Apple OAuth, OTP via Telegram, JWT Token Handling, API Security

Tools and DevOps: Git, GitHub, Docker, Expo EAS Build, CI/CD Pipelines, Vercel, Nginx, PM2, VPS Contabo

LANGUAGES

Arabic: Native / Bilingual | English: B2 Upper Intermediate (Professional Working Proficiency)
