Ali Mohammed Al-Bayati

Full-Stack and Mobile Developer | TypeScript | NestJS | Next.js | React Native

alialbayati468@gmail.com | +963 967 212 983 | Iraqi National | Based in Aleppo, Syria |
Portfolio: alialbayati.online | github.com/Ali4681 | linkedin.com/in/ali-al-bayati-59b41b319

PROFESSIONAL SUMMARY

Versatile Full-Stack and Mobile Developer with professional experience delivering production-grade applications across backend, frontend, and mobile platforms. Expert in TypeScript across the entire stack: NestJS and Node.js on the backend, Next.js and React on the web, and React Native with Expo on iOS and Android. Published apps on the Google Play Store and Apple App Store. Experienced in RESTful API design, real-time WebSocket systems, JWT and OAuth authentication, PostgreSQL and MongoDB data modeling, AI model integration, Docker-based CI/CD deployments, and Agile workflows.

PROFESSIONAL EXPERIENCE

Mobile Developer — RADAR Company July 2025 – Feb 2026 | Aleppo, Syria

- Developed and maintained cross-platform iOS and Android apps from a single React Native and Expo codebase.
- Built a reusable mobile component library with consistent design tokens, reducing screen development time significantly.
- Implemented Redux Toolkit and Zustand for predictable, scalable state management across complex multi-screen flows.
- Added full RTL and multi-language (Arabic/English) localisation using i18n for seamless MENA market support.
- Optimised performance via lazy loading, memoisation, and FlatList virtualisation; published apps via Expo EAS Build.

Frontend Developer (Part-time) — RAIZER (Startup Funding Platform) Mar 2025 – May 2025 | Aleppo, Syria

- Led frontend development of a startup funding marketplace using Next.js, React, and TypeScript.
- Built real-time chat UI, expert profile verification, and offline-ready video playback.
- Optimised Lighthouse performance scores through code splitting, lazy loading, and image optimisation.
- Integrated FCM push notifications and role-based UI rendering for investors and founders.

Backend Developer — RADAR Company Apr 2024 – Dec 2024 | Aleppo, Syria

- Designed and developed scalable NestJS and Node.js REST APIs consumed by web and mobile clients, following OpenAPI documentation standards.
- Built relational and NoSQL schemas using PostgreSQL with Prisma ORM and MongoDB with Mongoose, with indexing strategies to optimise query performance.
- Implemented JWT-based authentication, RBAC, and Google and Apple OAuth for granular, secure authorization across all services.
- Integrated Firebase Cloud Messaging (FCM) for real-time push notifications across web and mobile clients.
- Configured Docker containers, Nginx reverse proxy, and PM2 on Contabo VPS with automated CI/CD pipeline.

Frontend Developer — RADAR Company Feb 2023 – Oct 2023 | Aleppo, Syria

- Built responsive, high-performance web interfaces using Next.js, React, and TypeScript across multiple internal products.
- Developed a reusable component library with ShadCN UI and Tailwind CSS, cutting UI development time by approximately 30 percent.
- Implemented Redux Toolkit and Zustand for scalable state management across complex multi-step user flows.

- Added full multi-language and RTL (Arabic/English) support via i18n, enabling seamless MENA market coverage.
- Integrated Google and Apple OAuth and Firebase Cloud Messaging (FCM) for secure auth and push notifications.
- Deployed applications on Vercel and Contabo VPS with Nginx reverse proxy, PM2, and CI/CD pipelines.

PROJECTS

Beroya Holding — Multi-Brand Digital Platform (Full-Stack)

NestJS | *PostgreSQL* | *Prisma* | *Next.js* | *React* | *TypeScript* | *Tailwind CSS* | *GSAP* | *React Three Fiber* | *Socket.IO* | *Firebase FCM* | *Cloudflare R2*

- Delivered end-to-end multi-brand Beroya Holding platform: NestJS ERP for vehicles, properties, CS, and sales, plus Next.js public microsites (Intro, Cars, Real Estate, NOVA, Media) and three content CMS desks.
- Implemented OTP/MFA JWT auth with branch-scoped RBAC across SUPER_ADMIN, ADMIN, CS, and Sales roles, Socket.IO staff chat, FCM push, and R2 media uploads.
- Built bilingual RTL brand sites and cinematic NOVA/Media experiences with GSAP ScrollTrigger, Lenis, and React Three Fiber, driven by CMS content APIs.
- Owned Prisma data model and migrations for customers, inventory, CS workflows, sales deals, appointments, and CMS admin accounts, with Docker-ready deploy tooling.
- Coordinated OpenAPI contracts between NestJS ERP and Next.js desks, including refresh-token sessions, bilingual CMS editors, and production uploads.

Beroya Holding — Enterprise ERP Frontend

Next.js | React | TypeScript | Tailwind CSS | shadcn/ui | TanStack Query | next-intl | React Hook Form | Zod

- Built the multi-sector Beroya ERP frontend (Corporate, Automotive, Real Estate) in Next.js with a feature-based architecture and reusable shared ERP components.
- Delivered bilingual AR/EN RTL UX, sector-aware theming, and a responsive ERP shell with permission-filtered navigation and workspace switching.
- Integrated TanStack Query API layer with typed repositories, MFA/RBAC auth UI, and consistent loading, empty, and error states across list and detail screens.
- Shipped frontend modules for vehicles, CRM/sales/CS, finance, procurement, inventory, approvals, notifications, and audit with unified table and form patterns.

Beroya On + — School & University Shuttle Platform (Full-Stack)

NestJS | *PostgreSQL* | *Prisma* | *Redis* | *BullMQ* | *Next.js* | *React* | *TypeScript* | *Tailwind CSS* | *Socket.IO* | *Firebase FCM*

- Delivered end-to-end multi-institution shuttle platform: NestJS API for routes, daily trips, attendance, incidents, and ops, plus Next.js admin and institution dashboards.
- Implemented OTP/JWT auth across seven roles with institution-scoped data isolation, live Socket.IO tracking, FCM push, and Redis/BullMQ background jobs.
- Built bilingual RTL admin and institution panels (live map, trips, students, parents, fleet, KPIs) with light/dark themes and typed React Query API layer.
- Owned Prisma data model and migrations for institutions, routes, trips, attendance, incidents, and audit logs, with Docker-ready deploy tooling.
- Coordinated Swagger contracts between backend and frontend, including snake_case DTOs, refresh-token session handling, and MinIO file uploads.

Beroya On — Ride-Hailing Platform (Full-Stack)

NestJS | *PostgreSQL* | *Prisma* | *Redis* | *Next.js* | *React* | *TypeScript* | *Tailwind CSS* | *WebSockets* | *Firebase FCM*

- Delivered end-to-end ride-hailing platform: NestJS backend for dispatch, wallets, and finance, plus Next.js customer/staff web experiences.
- Implemented OTP/JWT multi-role auth, real-time WebSocket tracking and offers, FCM push, and branch-aware ERP operations.
- Built bilingual RTL landing and desk UI including finance performance dashboards, reports export, and App Store–ready legal pages.

- Owned Prisma data model and migrations for rides, ledger, incentives, and seed scenarios used to validate reporting and ops flows.
- Coordinated API contracts between backend and frontend with Swagger, typed clients, and Docker-ready deployment tooling.

Traffic Violations Management System — Backend

NestJS | PostgreSQL | Prisma ORM | JWT | RBAC | WebSockets | Push Notifications

- Architected a multi-role REST API serving three client apps (Citizen, Officer, Admin) with JWT authentication and granular RBAC.
- Built vehicle and violation management APIs including GPS-based violation registration with photo upload, license plate lookup, and payment processing.
- Implemented offline sync support for field officers, enabling violation registration without internet and background synchronisation when reconnected.

Olive Leaf Disease Detection — AI Mobile Application

React Native | Expo | Flask | Python | MobileNetV2 | Transfer Learning | TensorFlow

- Collected and labelled an olive leaf image dataset across 4 classes: healthy, acarus, peacock eye, and olive knot; applied augmentation and class-balancing.
- Trained a MobileNetV2 model using Transfer Learning in two fine-tuning phases, achieving 98.10 percent validation accuracy on disease classification.
- Developed a Flask REST API to serve the model and built a React Native app for field users to capture or upload leaf photos and receive instant diagnosis.

AutoService24 — Vehicle Services Marketplace

NestJS | PostgreSQL | Prisma | Firebase FCM | WebSockets | Google Maps API | React Native | Expo

- End-to-end vehicle services platform (backend and mobile) published on Google Play Store and Apple App Store.
- Built geolocation-based provider search (500 km radius), real-time WebSocket chat, RBAC service management APIs, and JWT and OAuth authentication.

LegalConnect — Full-Stack

NestJS | MongoDB | Mongoose | Firebase FCM | Next.js | React | TypeScript | React Native | Expo

- Led full-stack development of a legal services platform with separate web and mobile clients.
- Engineered scalable NestJS backend, Next.js frontend with real-time chat UI, and cross-platform React Native mobile app with offline support.

University Timetable Generation System — Capstone

Next.js | NestJS | MongoDB | Mongoose | CSP Algorithms

- Full-stack scheduling system using CSP algorithms to auto-generate conflict-free university timetables with real-time conflict detection.

Floppy Ball — Gyroscope and Voice Controlled Game

React Native | Expo | Gyroscope Sensor | Voice Recognition | TypeScript

- Developed a mobile game where the player controls a ball using device gyroscope tilt or real-time voice input, with two distinct control modes.

Vosk Offline Speech-to-Text Application

React Native | Expo | Vosk Speech Recognition | TypeScript

- Built a mobile application integrating the Vosk offline speech recognition model, converting spoken audio to text entirely on-device.

Islamic Inheritance Management System — Full-Stack

Next.js | NestJS | PostgreSQL | Prisma ORM | React Flow | PDFKit | TypeScript

- Built a full-stack Islamic inheritance calculator implementing Fiqh rules including ʿawl, radd, hajb, and Umariyyatayn edge cases via a rule-based engine.
- Designed an interactive family tree using React Flow with dynamic node relationships, real-time share calculation, and Arabic RTL rendering.
- Engineered Arabic PDF report generation using PDFKit with Cairo font and HarfBuzz shaping pipeline for accurate RTL text output.

- Developed a typed frontend data layer with custom React hooks consuming NestJS REST APIs backed by PostgreSQL and Prisma ORM.

EDUCATION

B.Sc. in Information Technology and Communications Engineering — Ebla Private University

Sep 2019 – Jun 2025 | Aleppo, Syria

Coursework: Software Engineering, Computer Networks, Database Management, Web Technologies, Communication Systems.

CERTIFICATIONS

Cybersecurity Training Program — Darrebni Company

Sep 2024 – Jan 2025 | Remote

Covered network security, web application penetration testing, threat detection, incident response, and vulnerability management. Received official recommendation letter.

TECHNICAL SKILLS

Backend: Node.js, NestJS, TypeScript, JavaScript ES6+, RESTful API Design, WebSockets, Microservices Architecture

Frontend: Next.js, React.js, TypeScript, HTML5, CSS3, Tailwind CSS, ShadCN UI, SSR, SSG

Mobile: React Native, Expo, iOS and Android, React Navigation, Deep Linking, Offline Support, EAS Build

AI and ML: MobileNetV2, Transfer Learning, TensorFlow, Flask, Vosk Speech Recognition, On-device Inference

State Management: Redux Toolkit, Zustand, Context API

Databases: PostgreSQL, MongoDB, Prisma ORM, Mongoose, Data Modelling, Indexing, Query Optimisation

Auth and Security: JWT, RBAC, Google OAuth, Apple OAuth, OTP, API Rate Limiting, Token-based Access Control

DevOps: Git, GitHub, Docker, Nginx, PM2, CI/CD Pipelines, Vercel, VPS Contabo

Services: Firebase Auth, Firebase FCM, Push Notifications, RTL i18n, Google Maps API, Geolocation

LANGUAGES

Arabic: Native / Bilingual | English: B2 Upper Intermediate (Professional Working Proficiency)
